DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are totally unclear and are an aggregation of elements not structurally related. It is unclear how each element corresponds to each other and what their functions are. Claim 1 recites a 'repairing device' but then states it is suitable for 'cleaning, maintaining, and repairing'. These do not correspond. What elements clean and maintain? All of the elements listed in claim 1 are an aggregation. Line 11, how is rotation carried out? How is the disc polished and rectified? What is the polishing element? How is a surface without defects determined? The 'laser beam' is not part of the device is it?

Claim 2, what does 'approx. tubular' mean? At an 'opening end' of what? 'The interior edge' and 'exterior edge' lack proper antecedence. Edge of what? What does 'locally recessed' mean? What is a 'toothed driving par', what is it driving? 'centrally provided' to what? What is the centrally 'hollow assembling part' central to? Axially opposite end of what? Receiving part of what? What does it receive?

Claim 3, what does 'adequate locations' constitute? Again the claims are replete with errors too numerous to mention each one and are merely a listing of the elements

Art Unit: 3723

with no structural correlation or function. Claim 4, 'types of repair element' is unclear. How many 'types' are there? 'within the boundary of the receptacle is further formed an operating portion' is totally unclear and does not make sense. Claim 6 is unclear, as well as, the rest of the claims. Applicant must thoroughly check each claim for clarity and errors and make proper corrections.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-9, as best understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Lin et al.-6,386,946

The applied reference has a common inventor with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Lin et al. disclose a machine for repairing, cleaning, and maintaining a disk as best understood from the claimed subject matter.
